Lychee Orchards

ARBORETUM

OF

WM. R. GROVE

LAUREL, SARASOTA COUNTY, FLORIDA

Four Miles North of Venice on Tamiami Trail (U. S. 41)

December, 1946

Visitors to the arboretum so frequently ask for the botanical and common names of many of our plantings that we have prepared this list of some two hundred and fifty of our tropical and sub-tropical fruit, economic, flowering and ornamental trees, shrubs, etc., that seem to evoke most interest. This list should serve to assist visitors in identifying items they may desire to further explore in horticultural works.

The list is offered only as a rough guide to assist visitors in recalling what they may have seen in the arboretum, and for the benefit of those who may be interested in furthering the development of horticulture in Florida.
